Toxicology 83 (1993) 233–235

TOXICOLOGY

TOXICOLOGY

SUBJECT INDEX

Volume 83 (1993)

acute toxicity, lindane, γ-hexachlorocyclohexane, γ-HCH, fish species differences, lipid content, 169
airways, ozone, rat lung, labeling index, 159
antioxidant defense, diabetes, vanadium, lipid peroxidation, trace elements, 115
aryl hydrocarbon hydroxylase, P450IA1, myometrium, uterine leiomyoma, smoking, 41
association stages of germinal cells, ochratoxin A, rat, testicles, enzyme variations, testosterone, 9
Azospirillum brasilense, 2,4-D, polyamines, protein synthesis, ribosomes, 19

cadmium, calcium, nickel, vascular smooth muscle, detergent-permeabilized, 1
cadmium, endothelial cells, endothelium, fibrinolysis, heavy metals, plasminogen activator inhibitor-1, 215
cadmium, selenium, glutathione, glutathione *S*-transferase, glutathione peroxidase, Rhesus monkey, liver, kidney, heart, 203
calcium, cadmium, nickel, vascular smooth muscle, detergent-permeabilized, 1
cell-surface carbohydrates, methoxyacetic acid, ethylene glycol monomethyl ether, teratology, EPR spin labeling, cytoskeletal proteins, 131
cis-Diamminedichloroplatinum (II) chloride, cisplatin, nephrotoxicity, dithiocarbamates, 79
cisplatin, cis-Diamminedichloroplatinum (II) chloride, nephrotoxicity, dithiocarbamates, 79
copper, tetrathiomolybdate, metallothionein, LEC rat, zinc, iron, copper metabolism, 149
copper metabolism, copper, tetrathiomolybdate, metallothionein, LEC rat, zinc, iron, 149
cytoskeletal proteins, methoxyacetic acid, ethylene glycol monomethyl ether, teratology, EPR spin labeling, cell-surface carbohydrates, 131

2,4-D, polyamines, *Azospirillum brasilense*, protein synthesis, ribosomes, 19
D-amphetamine, total non-protein sulphydryl groups, glutathione, housing in pairs, mice, hyperthermia, 31
detergent-permeabilized, calcium, cadmium, nickel, vascular smooth muscle, 1
diabetes, vanadium, antioxidant defense, lipid peroxidation, trace elements, 115
dithiocarbamates, cisplatin, cis-Diamminedichloroplatinum (II) chloride, nephrotoxicity, 79
DNA synthesis, trifluoromethylanilines (TFMA), rat organs, 49

endothelial cells, cadmium, endothelium, fibrinolysis, heavy metals, plasminogen activator inhibitor-1, 215
endothelium, cadmium, endothelial cells, fibrinolysis, heavy metals, plasminogen activator inhibitor-1, 215
enzyme variations, ochratoxin A, rat, testicles, association stages of germinal cells, testosterone, 9
EPR spin labeling, methoxyacetic acid, ethylene glycol monomethyl ether, teratology, cytoskeletal proteins, cell-surface carbohydrates, 131
ethylene glycol monomethyl ether, methoxyacetic acid, teratology, EPR spin labeling, cytoskeletal proteins, cell-surface carbohydrates, 131

fibrinolysis, cadmium, endothelial cells, endothelium, heavy metals, plasminogen activator inhibitor-1, 215

fish species differences, lindane, γ-hexachlorocyclohexane, γ-HCH, acute toxicity, lipid content, 169
food-additive, piperonyl butoxide, pesticide synergist, toxicity, subacute, mice, 93

glutathione, cadmium, selenium, glutathione *S*-transferase, glutathione peroxidase, Rhesus monkey, liver, kidney, heart, 203
glutathione, D-amphetamine, total non-protein sulphydryl groups, housing in pairs, mice, hyperthermia, 31
glutathione peroxidase, cadmium, selenium, glutathione, glutathione *S*-transferase, Rhesus monkey, liver, kidney, heart, 203
glutathione *S*-transferase, cadmium, selenium, glutathione, glutathione peroxidase, Rhesus monkey, liver, kidney, heart, 203
growth, lead, lead nitrate, growth hormone, pituitary, rats, 101
growth hormone, lead, lead nitrate, growth, pituitary, rats, 101
γ-HCH, lindane, γ-hexachlorocyclohexane, acute toxicity, fish species differences, lipid content, 169

heart, cadmium, selenium, glutathione, glutathione *S*-transferase, glutathione peroxidase, Rhesus monkey, liver, kidney, 203
heavy metals, cadmium, endothelial cells, endothelium, fibrinolysis, plasminogen activator inhibitor-1, 215
γ-hexachlorocyclohexane, lindane, γ-HCH, acute toxicity, fish species differences, lipid content, 169
housing in pairs, D-amphetamine, total non-protein sulphydryl groups, glutathione, mice, hyperthermia, 31
hyperthermia, D-amphetamine, total non-protein sulphydryl groups, glutathione, housing in pairs, mice, 31

iron, copper, tetrathiomolybdate, metallothionein, LEC rat, zinc, copper metabolism, 149

kidney, cadmium, selenium, glutathione, glutathione *S*-transferase, glutathione peroxidase, Rhesus monkey, liver, heart, 203

labeling index, ozone, rat lung, airways, 159
lead, lead nitrate, growth, growth hormone, pituitary, rats, 101
lead nitrate, lead, growth, growth hormone, pituitary, rats, 101
LEC rat, copper, tetrathiomolybdate, metallothionein, zinc, iron, copper metabolism, 149
lindane, γ-hexachlorocyclohexane, γ-HCH, acute toxicity, fish species differences, lipid content, 169
lipid content, lindane, γ-hexachlorocyclohexane, γ-HCH, acute toxicity, fish species differences, 169
lipid peroxidation, diabetes, vanadium, antioxidant defense, trace elements, 115
liver, cadmium, selenium, glutathione, glutathione *S*-transferase, glutathione peroxidase, Rhesus monkey, kidney, heart, 203

mercuric choride, mercury-metallothionein, renal mercury accumulation, rat, 61
mercury-metallothionein, renal mercury accumulation, rat, mercuric choride, 61
metallothionein, copper, tetrathiomolybdate, LEC rat, zinc, iron, copper metabolism, 149
methoxyacetic acid, ethylene glycol monomethyl ether, teratology, EPR spin labeling, cytoskeletal proteins, cell-surface carbohydrates, 131
mice, D-amphetamine, total non-protein sulphydryl groups, glutathione, housing in pairs, hyperthermia, 31
mice, piperonyl butoxide, pesticide synergist, food-additive, toxicity, subacute, 93
microsomal enzyme induction, 2,3,7,8-Tetrabromodibenzo-*p*-dioxin, 2,3,7,8-TBDD, rat, subchronic toxicity, oral administration, peliosis hepatis, 181
myometrium, P450IA1, aryl hydrocarbon hydroxylase, uterine leiomyoma, smoking, 41

nephrotoxicity, cisplatin, cis-Diamminedichloroplatinum (II) chloride, dithiocarbamates, 79
nickel, calcium, cadmium, vascular smooth muscle, detergent-permeabilized, 1

ochratoxin A, rat, testicles, association stages of germinal cells, enzyme variations, testosterone, 9
oral administration, 2,3,7,8-Tetrabromodibenzo-*p*-dioxin, 2,3,7,8-TBDD, rat, subchronic toxicity, peliosis hepatis, microsomal enzyme induction, 181
ozone, rat lung, airways, labeling index, 159

P450IA1, aryl hydrocarbon hydroxylase, myometrium, uterine leiomyoma, smoking, 41
peliosis hepatis, 2,3,7,8-Tetrabromodibenzo-*p*-

dioxin, 2,3,7,8-TBDD, rat, subchronic toxicity, oral administration, microsomal enzyme induction, 181
pesticide synergist, piperonyl butoxide, food-additive, toxicity, subacute, mice, 93
piperonyl butoxide, pesticide synergist, food-additive, toxicity, subacute, mice, 93
pituitary, lead, lead nitrate, growth, growth hormone, rats, 101
plasminogen activator inhibitor-1, cadmium, endothelial cells, endothelium, fibrinolysis, heavy metals, 215
polyamines, 2,4-D, *Azospirillum brasilense*, protein synthesis, ribosomes, 19
protein synthesis, 2,4-D, polyamines, *Azospirillum brasilense*, ribosomes, 19

rat, 2,3,7,8-Tetrabromodibenzo-*p*-dioxin, 2,3,7,-8-TBDD, subchronic toxicity, oral administration, peliosis hepatis, microsomal enzyme induction, 181
rat, mercury-metallothionein, renal mercury accumulation, mercuric choride, 61
rat, ochratoxin A, testicles, association stages of germinal cells, enzymes variations, testosterone, 9
rat lung, ozone, airways, labeling index, 159
rat organs, trifluoromethylanilines (TFMA), DNA synthesis, 49
rats, lead, lead nitrate, growth, growth hormone, pituitary, 101
renal mercury accumulation, mercury-metallothionein, rat, mercuric choride, 61
Rhesus monkey, cadmium, selenium, glutathione, glutathione *S*-transferase, glutathione peroxidase, liver, kidney, heart, 203
ribosomes, 2,4-D, polyamines, *Azospirillum brasilense*, protein synthesis, 19

selenium, cadmium, glutathione, glutathione *S*-transferase, glutathione peroxidase, Rhesus monkey, liver, kidney, heart, 203
smoking, P4501A1, aryl hydrocarbon hydroxylase, myometrium, uterine leiomyoma, 41
subacute, piperonyl butoxide, pesticide synergist, food-additive, toxicity, mice, 93
subchronic toxicity, 2,3,7,8-Tetrabromodibenzo-*p*-dioxin, 2,3,7,8-TBDD, rat, oral administration, peliosis hepatis, microsomal enzyme induction, 181
2,3,7,8-TBDD, 2,3,7,8-Tetrabromodibenzo-*p*-dioxin, rat, subchronic toxicity, oral administration, peliosis hepatis, microsomal enzyme induction, 181
teratology, methoxyacetic acid, ethylene glycol monomethyl ether, EPR spin labeling, cytoskeletal proteins, cell-surface carbohydrates, 131
testicles, ochratoxin A, rat, association stages of germinal cells, enzyme variations, testosterone, 9
testosterone, ochratoxin A, rat, testicles, association stages of germinal cells, enzyme variations, 9
2,3,7,8-Tetrabromodibenzo-*p*-dioxin, 2,3,7,8-TBDD, rat, subchronic toxicity, oral administration, peliosis hepatis, microsomal enzyme induction, 181
tetrathiomolybdate, copper, metallothionein, LEC rat, zinc, iron, copper metabolism, 149
total non-protein sulphydryl groups, D-amphetamine, glutathione, housing in pairs, mice, hyperthermia, 31
toxicity, piperonyl butoxide, pesticide synergist, food-additive, subacute, mice, 93
trace elements, diabetes, vanadium, antioxidant defense, lipid peroxidation, 115
trifluoromethylanilines (TFMA), DNA synthesis, rat organs, 49

uterine leiomyoma, P4501A1, aryl hydrocarbon hydroxylase, myometrium, smoking, 41

vanadium, diabetes, antioxidant defense, lipid peroxidation, trace elements, 115
vascular smooth muscle, calcium, cadmium, nickel, detergent-permeabilized, 1
zinc, copper, tetrathiomolybdate, metallothionein, LEC rat, iron, copper metabolism, 149
